What is ABA Therapy

ABA Therapy is using the principles of positive reinforcement among other strategies to increase desired behaviors such as language, social skills, and daily living skills while reducing things such as problematic behaviors. It is based upon decades of evidence-based research across thousands of studies that have shown these successful outcomes for children affected by Autism.

Why Choose Us

At Monark ABA we offer applied behavior analysis therapy services from a team of experienced clinicians. We evaluate each child based upon their needs, as well as, the needs of the family. We work together with you throughout the process to ensure you are supported every step of the way.

In Your Area.

ABA Therapy Services

Written and overseen by Master's degreed Board Certified Behavior Analysts (BCBAs). These services are delivered by one of our nationally certified Registered Behavior Technicians (RBTs) under the ongoing supervision of the BCBA. This therapy covers a variety of areas specific to your child, such as Social Skills, Language, Behavior reduction, and Daily Living Skills.
